6.2.1 - The institutional Strategic/ perspective plan is effectively deployed

In accordance with NAAC guidelines, the primary objective of the Internal Quality Assurance Cell (IQAC) is to develop a systematic approach that ensures continuous, conscious, and catalytic actions to enhance both academic and administrative performances. It also plays a crucial role in promoting quality enhancement by internalizing a quality culture and institutionalizing best practices.

At Government General Degree College, Singur, the IQAC is actively involved in fostering a positive teaching-learning environment and monitoring the quality of academic and administrative processes. Throughout the year, the IQAC organizes various seminars, webinars, and workshops. Beyond academic initiatives, the IQAC is also committed to promoting overall student development through sports, cultural programs, life skills training, and outreach activities.

Additionally, the IQAC oversees the celebration of significant days and, in collaboration with the Psychology Department, provides counselling services to both students and faculties. The cell also encourages the inclusion of value-added and add-on courses, helping students develop skills that complement their chosen field of study.

The IQAC engages in outreach efforts, maintaining strong connections with local bodies and schools to support the college's growth and development. One notable initiative involves faculty members visiting local schools to interact with students and educators, helping reduce dropout rates at the higher secondary level and inspiring more students to pursue higher education. Through these efforts, IQAC acts as a vital link between the academic sphere and the community, contributing to the moral, intellectual, and cultural development of society.

We have also fully implemented the NEP 2020 curriculum at the undergraduate level, offering a wide variety of choice-based subjects. With 17 departments, our institution provides a diverse array of courses, including Sanskrit, Anthropology, Psychology, Computer Science, and other major humanities and science disciplines, in line with the core principles of NEP 2020.
